PROJECTS

01/2025 - 08/2025

DPWorld.com

Recently built a dpworld.com leveraging AI-assisted coding with Claude Code. Developed using Next.js, Tailwind CSS, and Sitecore XM Cloud (JSS), delivering a responsive, scalable solution with modern UI and enterprise-grade content management.

<https://dpworld.com/>

03/2022 - 03/2023

SeaWorld Website Redesign

Development of SeaWorld Abu Dhabi's website using React.js and Sitecore JSS within a monorepo architecture

<https://www.seaworldabudhabi.com/>

03/2023 - 03/2024

DIFC website

First UAE Project in Sitecore XMC JSS using NextJS, Tailwind, TypeScript Storybook

<https://www.difc.com/>

02/2019 - 03/2022

Emirates NBD Website

I was responsible for handling the entire development process of the Emirates NBD Group website from start to finish in Sitecore

SUMMARY

Innovative Engineer with 15+ years of experience bridging traditional frontend development and cutting-edge AI-assisted prototyping. Skilled in **React.js**, **Next.js**, **TypeScript**, and **Tailwind CSS**, with a proven track record of building scalable enterprise applications (Sitecore XM Cloud, JSS) and **design systems**.

In parallel, I actively leverage **AI-powered tools** such as **Cursor**, **Claude.ai**, and low-code platforms to accelerate experimentation, vibe-coding, and rapid iteration turning early concepts into working applications at speed. Experienced in integrating APIs, automating workflows, and collaborating across international teams, I bring both strong technical fundamentals and creative agility to build next-gen FinTech and AI-driven solutions.

Next.js | Typescript | Tailwind | ReactJS | Design System | Storybook | Sitecore XM Cloud | Git | Figma | Jira | Agile/Scrum | Performance Optimization | RESTful APIs | Bootstrap | Ember.js | OAuth | SASS | SSO | LDAP | Claude.ai | Supabase | GitHub Copilot | OpenAI API | n8n |

EXPERIENCE

Horizontal Digital

Dubai, United Arab Emirates

Senior Front End Engineer

03/2021 - Present

- Led development of enterprise-level web applications using React.js, Next.js, and TypeScript, resulting in improved user engagement and performance metrics
- Architected and implemented complex frontend solutions utilizing Sitecore XM Cloud and Sitecore JSS
- Established frontend development standards and best practices, improving code quality and team productivity
- Mentored junior developers and conducted regular code reviews, fostering team growth and maintaining high code standards
- Collaborated with UX/UI designers to implement responsive, user-friendly interfaces
- Optimized web applications for maximum speed and scalability
- Leveraged AI-assisted tools (Claude.ai, Cursor, GitHub Copilot) to accelerate prototyping, automate workflows, and reduce development time

Emirates NBD

Dubai

Lead Frontend Developer

02/2019 - 03/2022

- Spearheaded the complete redesign and development of the Emirates NBD Group website
- Implemented responsive design principles ensuring optimal user experience across all devices
- Managed integration of Sitecore CMS with frontend architecture, streamlining content management
- Led a team of developers, ensuring project milestones were met while maintaining code quality
- Optimized website performance, resulting in improved load times and user engagement
- Collaborated with stakeholders to define technical requirements and deliver solutions aligned with business goals

EXPERIENCE

HootBoard

Remote

Lead Frontend Developer

10/2015 - 02/2019

- Directed frontend development initiatives using AngularJS and modern web technologies
- Managed web application architecture and API integrations
- Established development processes and coding standards
- Led stakeholder communications and requirement gathering
- Implemented responsive design patterns and optimized application performance

Horizontal

Vadodara, India

Senior Frontend Developer

04/2014 - 09/2015

- Developed and styled websites for enterprise clients using Sitecore
- Created mobile-specific and interactive web solutions
- Implemented frontend styling for large-scale websites
- Collaborated with design teams to create optimal user experiences

Digitas

Ahmedabad, India

Sr. Interface developer

07/2012 - 12/2012

- Transformed PSD designs into responsive HTML/CSS structures, optimizing for code reusability and maintainability
- Implemented JavaScript functionality to integrate with .NET AJAX framework while maintaining graceful degradation for non-JS users
- Ensured cross-browser compatibility and accessibility standards met BT's enterprise requirements
- Successfully delivered the project on schedule, receiving full client approval and launch authorization
- Drove design optimization discussions to improve HTML structure efficiency and CSS reusability

.INVESTIS

Investis

Vadodara, India

Web Developer

06/2009 - 06/2012

- Developed front-end solutions for high-profile corporate websites, investor relations platforms, and online annual reports for leading UK and international companies
- Successfully delivered 10+ major web projects as Web Producer, consistently meeting client deadlines and quality standards
- Built responsive, accessible interfaces using XHTML, CSS, and jQuery, integrated with Sitecore based CMS (IP3)
- Implemented front-end best practices and accessibility standards across multiple enterprise-level websites
- Conducted comprehensive website audits to improve usability, accessibility, and performance metrics
